present to the proprietors, and also in being able to state that the London business for the past year has been very satisfactory, both

The sub-manager has visited the principal agencies of the company in the neighbourhood of the hosiery mill to enquire how the high standard achieved by the "Queen" in the company's hosiery section has been maintained. This section of the company has been able to maintain its position as the best in the industry.

The sub-manager has also visited during the year the company's various departments to ascertain the progress made in the various directions anticipated that his visit will result in considerable advantages to the company.

PARAMMATTU

[FROM OUR CORRESPONDENT.]

THE fortnightly meeting of the Board of Directors of the Berhampur Cotton Mill was held in the Council Chambers at 3.30 p.m. on the 26th instant. Present—The full Council. The minutes of the previous meeting were read and confirmed.

Lighting Committee's report, and the report of the Fr

[illegible]

report to this Council, at their earliest convenience, the

state of water supply to this borough. That the applicants, Messrs. James and John Company, requesting permission to asphalt the footpath in front of their premises in George street, be conceded, as recommended in the Improvement Committee's report adopted this day. That Krose Hill be let to the lowest bidder for a term of years, not to exceed in a cost not exceeding £25. Three resolutions, standing in the name of Alderman John Taylor, were withdrawn, and the meeting adjourned till the next evening, to be held on 26th October. The meeting then terminated.

ARTILLERY PRACTICE FROM PORT DENISON.

TO THE EDITOR OF THE HERALD.

SIR,—Under those letters to the Editor, signed by Mr. W. L. Melville, appears in to-day's *Herald*, "He admits having sailed between the four white flags marking the Volunteer Artillery target."

It is to be feared that the target is not large enough for this gentleman without encroaching upon this or a small space on the sea.

He states that one gun was fired while his boat was

within the flash, I can only say that I was upon the tower at Fort Denison, watching each shot for the official record, and amid his noise the gun fired while any boat was anywhere near the target.

The greatest deflection on Saturday, I may add, was 300 yards, and that for only one shot (the 38th in the match) and that was the only time that the vessel fired to the left.

Mr. Melville's final question about anchoring a craft proximity to the target scarcely requires an answer; but he has asked it, and I will answer it; the experiment.

I am, Sir, your obedient servant,

ONE OF THE MATCH COMMITTEE.

Sydney, October 26.

TO THE EDITOR OF THE HERALD.

SIR.—I cannot allow that Mr. G. H. Melville's letter in your issue of the 20th inst. is correct, and I think it would be all probability leave a false impression on the minds of many of your numerous readers.

Mr. Melville in his first paragraph, and another of the same class, a craft, "steamed" towards the target, when it was warned from the steam-launch moored off it "that

persisted on their course, and an answer of some sort was given from one or other of the boats—what it was I con-

I would ask Mr. Melville what "absolute necessity" was for crossing the line of fire? He was sailing from Woolloomooloo Bay down the harbour, with about 1000 men on board, and he was firing a mine at either side of the target without the slightest difficulty. Surely our harbour is broad enough for all.

ARTILLERYMAN.

NEW MINING BILL.

TO THE EDITOR OF THE HERALD.

SIR,—If the opinions of your correspondent Parkes are a yarn with his facts they are not of much value. In your issue of this day he says, Mr. Lucas has ignored the opinions of the miners as regards the new mining bill. Such a statement is simply incorrect, and those who make it must either be illinformed or ill-instructed—to put it mildly. "Parkes" may be a good fellow, but he is not a miner. What should Mr. Lucas have done, that he has not done?

as Minister for Mines, was to announce his intention to introduce a new Mining Bill, and to ask for suggestions.

then agent from all quarters, especially from the miner community. This was scarcely an intelligent miner in New Brunswick, W. Va. who had been in the coal mines for 20 years. Mr. W. C. Lucas, and if I am correctly informed many miners complained with Mr. Lucas's request and furnished valuable suggestions and criticisms. It is not to be denied that Mr. Lucas's consideration during the whole of this time Mr. Lucas was of this his repeated public announcements, and the effect of such instructions and suggestions. Just before the election of last session Mr. Lucas was informed by the editor of the *Journal* of the declared object of having it printed, so that during the recess it could be discussed, its defects pointed out, and the suggestions received. Mr. Lucas, however, did not admit that copies have been sent to the county newspapers, in order that its provisions should be made known to the miners. With more could Mr. Lucas say, if the miners have not made their own knowledge of it certainly is not through any neglect of Mr. Lucas. If the bill be as objectionable as your correspondence points out the defects and their remedies, than to newspaper

How the latter course should be described, "I dinna care."

The bill is a great improvement upon the present Act. I shall take the opportunity of offering suggestions for improvement, according to my lights. But on this occasion I write chiefly to deny the allegation that Mr. Lucas has ignored the miners, and to protest against the opinion that the bill is a mere compromise between the miners, as those of the intelligent miners residing on the gold-fields known by that name, or even as the opinion of a Parkersburg man, and the opinion of the State Legislature. Mr. "Timbuckoo," as his name is called, might have adopted the opinion of the miners, and have passed the bill as the "Parker's." I think I could put my hands on his shoulders without passing outside the city boundaries. The bill is a great improvement upon the present Act.

Mr. Lucas, in common with every other public man, fair game for criticism, and he has no right to expect to escape criticism. He has no right to expect to be faultless. He is entitled to be truthful and correct in his statement of facts. His Minister and messenger have both a right to

Syracuse, October 26. FAIR PLAY.

TERMINUS.

TO THE EDITOR OF THE RECORD.
SIR,—It has occurred to me often when at the Redfern Railway Terminus, how very advantageous it would be if passengers who might want to cross from one platform to another, could do so by means of a footbridge. A footbridge has been erected for years at the Hobson's Bay Company station in Melbourne, where passengers go to and fro from the Melbourne and Hobson's Bay Railway Company's train. I noticed the want of some such convenience some particular morning, when a friend of mine who arrived at the station, an suburban train wished to see friends who were about to leave in a suburban train. I saw that it took a minute to get across from the other platform, and consequently had either to cross the lines which is very inconvenient, or to wait until the suburban train had left. Had he adopted the latter course the Rattusmull train would have started before he arrived on the platform, and might then have been such inconvenient.
I have to apologise for the length of your valuable space, and trust that this letter will not be written in vain, but that the proper authorities will act somewhat

MELBOURNE.

Sydney, 26th October.

THE SYDNEY INFIRMARY.

 TO THE EDITOR OF THE HERALD.
 Sir,—Your report of the interview between the deputations from the Prince Alfred Hospital and the Medical Society on Friday last, states that Mr. Belgrave said that the cause of perusal fever which have lately appeared in the country had their origin from the Sydney Infirmary.
 I have been instructed by the House Committee, after consultation with their Honorary Medical and Surgical staff, to inform the public, through you, that this statement is utterly destitute of foundation.
 I remain, Sir, your obedient servant,
 H. W. BUSELL, Secretary.
 October 26.

ny au/nla news-page

OF MORNING HERALD,

even at the slightly higher level at which it now stands, the Legislature would have thought twice of three times before sanctioning a change so extensive, and would probably have ended by refusing to sanction it altogether. We do not say that the course of events has actually proved the inexpediency of the change. The new department has at least (according to Mr. Lumsden) been working off a large amount of arrears of business. But what unmeasured credit would have been taken for the wisdom

The change had the course of events, and influences independent of the Mining Act of 1872. The department, instead of tending to a collapse in mining speculation, continued to inflate it as vigorously as ever.

This working-off of arrears, of which Mr. [redacted] repeats, is, however, to a large extent, a matter of routine. The books are being cleared of past applications and proposals that have really been in them, and represent nothing. And it is not to be seen whether, if another mining fever should break out, the new department would be able to deal as efficiently than the old one with the requirements of the day as they arose. It is not fair to compare the working of the present Mining Department with the working of the mining branch of the Lands Department four years ago. The state of things that has prevailed since May, 1874, has been very different from the state of things existing in 1872 and 1873. In the earlier days, everybody who had gold or could lay hands upon a patch of land

urged to contain minerals was in the copper and molybdenum fields, and the anticipation of large profits. Mineral lands were generally held at a fictitious value; and the Government was well nigh overwhelmed with applications of buying, classifying, and conceding them. In the matter, many of the men considering applications were from the United States, and they were related to identical tract country, and they were at least to areas with overlapping mineral rights. That the business of the department was not to fall into utter confusion, as the business of the Lands Department of Victoria is said to have done under a somewhat similar pressure—where the desire was to obtain land simply and not for the "dreams of avarice"—is a matter for wonder and congratulation. But the same department was not brought into existence in the same manner—like marriages in continuance—by undue eagerness and haste at the outset, and is followed by repentance at leisure, the new department was called into being to provide

the department of patronage, which, since the reorganization of the department, has been struggling with the difficulty of securing a satisfactory solution of the problem of satisfying the demands of a public service clamorous for attention, the new Mining Department has been occupying itself—busily, without doubt—in sweeping up the litter left by many of those applications which Mr. McLEWIS now boasts of having disposed of have no real meaning or value, or represent anything beyond the disappointment and disgust of persons to whom the very name of mining enterprise has become odious. In the course of time, we suppose, the book will be cleared, and the last remains of thousands of mining applications, worth no more than the paper they were written on, will be buried decently according to law, with all the necessary forms and ceremonies. But their real value and power of the new departmental will not be tried until it is subjected to the real pressure of a new period of excitement resembling that of 1872. And, if such a

When looking back over the past year, the question arises whether we are not finishing department, and thus ourselves, when the arrival of the past year's harvest is over. We fear that Mr. Lucas will call one of those lines of men, he lost to the country, another band of those mighty mass of red-tape and official correspondence. But his subordinates will find no excuse for their functions enlivened by a new interest when they are engaged in the unwanted exercise of digging out the buried treasure.

We are in possession of the American Statistical Service for the year ending June 1875. It would be a great advantage if our own Government departments were to take a leaf out of other countries' books in the matter of the publication of official documents. It not infrequently happens that we find ourselves having to go through one year before we get important reports of the year preceding. Statisticians in other countries, however, have had to learn that it is not enough to be interested in the figures before much of the interest attached to them has passed away. The following figures will show the American imports and exports for 1874 and

| | 1874. | 1875. |
|--|-------------|-------------|
| | Pounds. | Dollars. |
| Merchandise, | 507,406,811 | 243,631,243 |
| Specie, | 28,514,906 | 20,804,317 |
| EXPORTS FROM THE UNITED STATES. | | |
| Merchandise, | 369,133,121 | 169,256,296 |
| Specie, | 16,910,919 | 14,058,292 |
| Re-exports of foreign goods .. | | |
| Imports of merchandise | 559,254,000 | 218,341,618 |
| Merchandise, | 500,040,000 | 210,000,000 |
| Specie, | 6,300,719 | 8,751,714 |
| Re-exports of foreign goods .. | | |
| Total exports of specie | 56,530,405 | 22,123,412 |

From these figures it will be seen that in almost every particular the commercial status of America is far from hopeful. Complaints of business depression have been general throughout the United States for two or three years past. In the departments these complaints are especially marked, in consequence of which the question is beginning to be more generally asked whether protection is proving itself to be the best thing even in America.

THE MINISTRY.—We are authorized by the honorable the Colonial Secretary to state that there is no foundation whatever, in fact, for the rumors which have

put into circulation with respect to proposed changes in the composition of the Cabinet. Mr. Foster has not yet been appointed Agent-General for the colony in London, and the British Government are awaiting the result.

RAILROAD POSTS AND PACKS AGENTS.—We are informed that the statement which was made on Thursday last by "a correspondent," to the effect that letters posted in the General Post Office for Baltimore who twenty-five miles from the city, would be delivered in the morning, at a matter of fact, letters posted at the General Post Office by 8.30 a. m. are delivered in some parts of Baltimore by 9 a. m., and every package of letters by 10 a. m. Letters posted in the post office in every part of Baltimore, as they happen to be addressed, before 9 a. m.

DISTRICT COURT.—October 27. (Prigg v. Dickford, *Falls v. Larkin.*)

FALL RAILWAY ACCIDENT.—A shocking accident occurred on the Great Western Railway at Perth, yesterday morning, to the astonishment of Peter Flynn. After the arrival of the 10 o'clock train, the engine and the first four cars of the train, consisting of twenty trucks, was taken out, and was being worked to the No. 10 up on main line, and with view of getting attached, when Flynn, who was standing on the platform, saw the engine and the first four cars of the train, but, instead of stopping under the buffers in the usual manner, he attempted to pass between the engine and the first four cars, and at that time, he was caught between the buffers and injured in

Accident.—An old woman named Anna Therna was picked up yesterday by a constable in the vicinity of Plymouth, that was suffering from severe rheumatism, and was admitted into the lunatic asylum.

TELEGRAPHIC MESSAGES.

AMERICAN ASSOCIATED PRESS TELEGRAMS.

CAIRO.

Two towns are quite alive with visitors to attend the Egyptian festival.

GUINNEA.

An old and feeble shepherd on the Bango station, named Henry Back, was found dead in his hut this morning. His body was lying on the ground in the hut, and his head had been smashed in with an axe, which was found lying on the floor near the body.

GLIN INNES.

The Rev. Charles Clark lectured to a crowded audience on Saturday.

MUSWELLBROOK.

On Sunday last, a lad named Edward Baker was climbing a limb of a tree after a nut-brown hen, when the limb broke, causing him to fall. He broke both arms, and was injured internally. He died on the following evening.

BRISBANE.

Mrs. Cooper, a passenger by the Blackbird (s.), died off Cronulla Island, on Saturday.

MELBOURNE.

All the horses arrived this morning in good order. The Collingwood Register will be prosecuted on Tuesday, and Ross will also be prosecuted for conspiracy in the same case.

QUEENSLAND.

Arrived—King Oscar (barque); and Nalad (brig), from Newcastle.

BALLARAT.

Messrs. Enderbush, Egglestone, and Co. report:—We sold a draft of the Hon. Neil Black's, Mount Moorabool, averaging 218 1/2, for 112 1/2, 6d.

HOBBART TOWN.

The second session of Parliament was opened by the Governor yesterday morning. The speech was delivered by the Governor, and the session opened on Saturday.

LAUNCESTON.

The wreck of a large three-masted vessel is reported to have been discovered in the sands, near the reef, between the Arthur and Pieman Rivers, on the west coast of Tasmania.

ADELAIDE.

The Agent-General telegraphs that he has closed negotiations with the Government for the purchase of the Port of Adelaide on Saturday.

VICTORIA JOCKEY CLUB RACES.

The following are the entries for the principal races for the Victoria Jockey Club Meeting:—

BY TELEGRAPH.

Mr. G. H. B. has been elected to the position of Treasurer of the Victoria Jockey Club.

ROYAL PARK STAKES.

The race for the Royal Park Stakes was won by the colt, named 'The Prince of Wales,' owned by Mr. G. H. B.

THE TYPE WRITER.

The 'Type Writer' is a new American invention, and is described in the 'Anglo-Australian' of September 23rd.

CIVIL SERVICE MEN.

The Civil Service Men are to be paid a bonus of £100,000, and the Government is to be paid a bonus of £100,000.

RECURSION.

The annual picnic of the North Sydney Congregational Sunday School took place yesterday.

MARTIN BAKER.

Martin Baker was a young man who was killed in a railway accident. He was a student at the University of Sydney.

COOPER.

The following is a return of the number of sheep received at the Sydney station for the week ending 24th Oct. 1876.

WEDNESDAY, OCTOBER 27, 1876

[illegible][illegible]

that we no reason they should
 k it. (Hear, hear.) They should do
 O'Connell did—take an instalment 'if they could
 the whole, and he took it that it was their duty to
 they desired that the publicans should have the
 the village as all other shopkeepers—that their shops
 closed on the Lord's Day. (Cheers.) The sub-
 the excursion round the harbour was one of suc-

deceit, and he could only that he approved recent suggestions in the report; all testimony that these excursions were open to very grave doubts. He said that he had no personal report that he desired to refer to—the influence of the public morals. The report did not venture with this monstrous evil. It appeared to him that the State at Albany had been the most fruitful source of immorality. How could Sydney, his son or his daughter influence of certain vices and low character of his countrymen. He said that fresh forms of inducement to attend the and crowds went every night, and the money in it was very much surprising. A gentleman on this subject, grudge very much the large money carried away out of Sydney by these But that was one of the least evils; the worst was the fact that the State had been the present embodied as a school of morality. It was one of the means by which evil was introduced into the community, and it was introduced into the community. He said that the State was a breeding land for their vices in places that

the men and mistress knew nothing about when the car was driven to the garage. When it was impossible to put such influences to rest, he appealed to any thoughtful, reflective person who might be able to suggest ways to persuade to encourage the theatrical performances to be carried out in this city of Sydney. (Appendix 1) He should also observe that he thought that the most important of the problems that ought to be emphasized on having seen as a quarter where they little expected to find on the streets of Sydney. He had been in the country, he ventured to suggest that the Society for Protection of Cruelty to Animals had a field for their work in Sydney. He had seen a number of cases in which some of these noble animals were treated with respect to humanity. (Appendix 2) He did not know how to follow upon such a suggestion, but there was a deal of concern about the traffic in the movement abroad, but whether it was a law or a custom was not understood. At any rate he was in the opinion that the traffic in the city was a serious one, as a scene on the Ballarat Racecourse by a cor-

[illegible]

might be borne in mind by those who took an interest in the subject, that the Association was expected by some that this association would pursue a different field of action from that which was expected, that they should be factious and quarrelsome, and that they should be the enemy of the Society of Cruelty to Animals, in prosecuting offenders against the laws of morality, but it was clearly pointed out by those who were present, that the matter was not so, that they would endeavour to deal with evil, but they intended to act by moral suasion, enlightening the public mind, and pointing out the evils which they produced and corrected them and pointed by all moral means to correct them and put them away. (Heat, here.) And this it would be seen, that the Association had done, and that the Association during the past year. It was modest to report that the year had been an uneventful one, but it was a year in which the Association had worked which had engaged the attention of the public, and which had not been unimportant, for they had grappled with the moral evils, and endeavored to direct public opinion to the necessity of the abolition of the existing system was one of the most important matters presented to the public morals that the committee had to deal with.

M.C.'s Hon. G. Allen, M.L.C.; the Dean of Sydney, Treasurer—Mr. James Watson, M.L.A. Secretary—Mr. J. H. Wainwright, M.L.A.

H. Morston, Dr. Steel, T. Johnson, J. G. Frost, J. Greenwood, A. W. Webb, W. Currow, J. Barnes, C. Stephen, R. B. L. Langley, B. Cooper, J. E. Williams, Dr. Mr. R. S. Harding, J. E. Williams, J. F. Foster, Mr. P. J. Reeve, Mr. Clements Lewis, Mr. J. J. Plummer, Dr. Neild, Mr. S. Callaghan, Mr. J. Putnam, Mr. J. D. Macdonald.

Dr. NEILD seconded the resolution, which, like the preceding, was carried unanimously.

The motion, and the benediction pronounced by the Bishop of SYDNEY, closed the proceedings.

A POZZED JURY.—Three successive verdicts were returned by the jury in an action brought at the Gloucester Assizes on the 10th August, before Mr. Justice Stirling, by the proprietor of the King's Arms Hotel, Oxford, against Mr. Attridge, who had been the sufferers by the Skipton railway accident on Christmas Eve last, to recover £217 s. 4d. for loss incurred while she and her daughter were lying ill in hospital.

[illegible]

their business in a becoming manner; but he was very many whose sole object was gain—who were without principle or conscience—and who were dissolute and fallen women, and who were fattening on station. (Chorus.) He knew this, and had seen it often for years, and he had spoken of what he thought about it, but they would not listen. They aimed at—although he did not know what motive of the association had determined—a more refined and elevated style of life. Here we see one of the papers read before the Social Science Convention in 1870, the writer proposing that there should not be any dancing, no drinking, no gambling, no forming a burial board or taking any other steps to remove the scandal.
